The Command Line

Non-Developer Workflow

Developer Workflow

What can I do with the Command Line?

ADD FOLDER

REMOVE FOLDER

LIST CONTENTS

ADD FILE

REMOVE FILE

NAVIGATE TO ANOTHER FOLDER

The Command Line

Action	Type	What does it do?
`mkdir`	Folder	Creates new folder
`touch`	File	Creates new file
`rmdir` or `rm -rf`	Folder	Removes folder/recursively removes all items in folder & removes folder
`rm`	File	Removes file
`ls`	Folder	Lists everything in folder
`cd`	Folder	Changes what directory you're in

The Command Line - Your Turn

1. Make a folder on the Desktop called 'command_line_excercise'
2. Inside that folder, make a folder called 'exercise_1'
3. Create an empty file called 'awesome.txt'
4. Go back out one directory and create another folder called 'exercise_2'
5. Change into that directory
6. Change back out
7. Delete the 'exercise_2' folder
8. List everything in the current directory you are in
9. Change into the 'exercise_1' folder and list everything in it
10. Call one of us over!
